

What's New in iLearn!

August 2016

New Look · New Feel · New Tools

The user interface has been completely restyled in order to provide powerful new capabilities and a clean, modern design. The new interface provides an enhanced user experience on any device, from desktop computers to smartphones. With a range of new tools and enhanced features, the new iLearn provides an enriched and innovative learning environment that suites your needs.

HOME

- Newly designed **HOME** icon
- Enhanced individual profile area
- Breadcrumb navigation bar
- Simplified process for managing favorite course and project sites
- Improved accessibility and screen-reader compatibility

Tests & Quizzes

- Simplified interface for setting up quizzes
- New question type: Hot Spot
- New side panel that allows students to track question progress in an assessment
- Improved reporting of student submissions
- Enriched functionality to manage working and published tests and quizzes

Course Tool Customization

- New course and project landing page
- New course tool menu structure
- Greater functionality to add, modify, and remove tools on the course menu
- Enhanced functionality to reorder tools on the course menu

Lessons

- Simplified interface and menu
- New page layout design capabilities
- New functionality to create multiple columns and sections on a page
- Linking directly to Forums
- Enhanced Student Page and peer review functionality
- Minimizing confusion by keeping content and activities organized and easily accessible.

Gradebook NG

- New spreadsheet style interface
- Simplified settings page
- Easy to navigate, manage, save, and distribute grade information
- Improved student grade summary page
- Flexible display options for final course grades (letter grade, percentage, or points)

Math Notation

- Displaying LaTeX equations as mathematical notation
- Accessible, with screen-reader compatibility
