On **Tuesday, July 21st**, there will be an upgrade to iLearn which has added several new features and addresses a number of technical problems or “bugs.”

This briefing document is broken into three sections:

- **iLearn Enhancements** – These are changes to how tools function or work
- **New Tools** – These are new tools that have been added to the iLearn system
- **iLearn Fixes** – These are technical “fixes” to known problems or “bugs”

## iLearn Enhancements

<table>
<thead>
<tr>
<th>New iLearn Appearance</th>
<th>Highlights</th>
</tr>
</thead>
</table>
| ![New Color Scheme](image1.png) | - New user interface  
- Designed for easier viewing |

<table>

<tr>
<th>Help Menu Interface Enhancements</th>
<th>Highlights</th>
</tr>
</thead>
</table>
| ![Help Menu Interface](image2.png) | - Grouped by type of task  
- Easier navigation  
- Videos organized by topics |
### New Tools/Functionality

#### NEW Lessons Tool

**Highlights**

- The Lessons (NEW) tool allows the instructor to organize resources, quizzes, assignments, forums, and media (e.g. videos, audios and images) in a central location so that students don’t need to navigate to different tools for task completion.
- The Lessons (NEW) tool also allows instructors to structure courses in a modular format that can guide students smoothly through their learning tasks.
- Overall, it is seen as a more sophisticated tool that allows the instructor more flexibility.

#### Page Order Helper

**Highlights**

- Instructors will be able to hide tools from student view while still able to use the tool in the site.
- Page Order Helper tool can help you customize the navigation on the left menu bar.
- Easy to use tool that allow for reordering lessons, hiding tools - all with the ease of drag and drop.

### Additional iLearn Changes

<table>
<thead>
<tr>
<th>Help</th>
<th>iLearn online help menu updated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Search</td>
<td>Overall improved performance</td>
</tr>
<tr>
<td>All tools</td>
<td>Browsers support upgraded</td>
</tr>
</tbody>
</table>

**NOTE:** Many additional issues have been addressed by this upgrade but because they relate to how the underlying system works and are technical in nature, we have opted not to mention them specifically in this document.
